BUDGET PHILOSOPHY

A budget is a plan for financial operation made up of proposed expenditures for a given period and the proposed means of financing them. A budget is prepared as a plan to carry the mission of public schools and to insure that all necessary programs are provided for.

The choice of the appropriate budget method is an important decision. Some budget methods may promote greater board and community understanding of the budget and ultimately, the district's priorities, than others. If the community can see the connection between dollars and educational programs, it is likely that the school board will be more successful in gaining acceptance of the budget from school district patrons. In addition, budget methods which result in better community understanding may result in increased financial support of schools. This will also determine which educational priorities are seen as important to the community.

A benefit of a move toward greater decentralization of financial control may well be that such a move increases the ability of the school principal to effectively direct resources to achieve program goals. Also, budget methods which attempt to direct resources to program needs rather than "across-the-board" increases serve to increase cost effectiveness. One of the drawbacks to decentralization is that curriculum coordination across programs and schools may be difficult. An effective management information system, open lines of communication among staff members, and a concern for equity should alleviate some of these problems, while allowing a school administrator to target resources to students' needs at the same time he or she manages a consistent and coherent educational program.

One of the potential disadvantages of a budget method which does not use an "objective" formula to allocate resources is that politically active groups may be in an advantageous position to lobby for additional funds. When using certain budgeting models that allow for community participation, great care should be taken to effectively guard against undue influence of special interest groups. The degree to which children will receive equal access to educational resources will depend to a large extent on the commitment of school officials to equity and excellence.

2017-2018 BUDGET TIMETABLE

The budget cycle is typically a year-round process, beginning with ongoing fund balance projections and statutory staffing commitments that are required to be made by the first Monday in June of each year prior to the start of the upcoming fiscal year in July. At any one time the Superintendent is concerned with three fiscal years' budgets; planning for the next fiscal year, administering the current fiscal year, and evaluating the last fiscal year. It is very difficult to manage a public school budget because the major expenditure, salaries and benefits, must, by law, be committed before revenue allocations are known.

The budgeting timetable for this fiscal year is shown below:

June, 2017	Renew Teacher Contracts
June, 2017	Renew Support Personnel Contracts
June, 2017	Approve Temporary Appropriations
July, 2017	Notification of Initial State Aid Allocation
August, 2017	Certification of Property Valuations by County Assessor
September, 2017	Board of Education approval of Estimate of Needs
September, 2017	County Excise Board approval of Estimate of Needs
October, 2017	Board of Education Approval of Operating Budget
December, 2017	Notification of Mid-Term Adjustment to State Aid Allocation
If needed.....	Request(s) for Supplemental Appropriations and Amendments to Operating Budget

APPENDIX A

BUDGET GUIDELINES BY FUND

11 GENERAL FUND (FOR OPERATIONS)

The general fund of any school district is hereby defined as a current expense fund and shall consist of all revenue or monies that can legally be expended within a certain specified fiscal year, but shall not be considered as including any money derived from a special Building Fund levy, nor shall it include any monies derived from the sale of bonds. Expenditures from the General Fund shall be non-capital in nature.

Revenue

When planning a budget, the first step is to project revenue in order to determine the funding level available to finance expenditures. At one time, the General Fund balance was required by law to be no greater than 12%. However due to hardships created by revenue shortfalls at the state level in past years, the legislature, in 2005, increased the allowable fund balance to 14% for schools with General Fund revenue of \$10,000,000.00 and above which includes Guthrie Public Schools. Every effort should be made to limit expenditures in any fiscal year to the amount of revenue collected in that year to prevent any material erosion of the fund balance. In the 2016-2017 fiscal year, the district experienced an operating surplus of \$368,378.52. The current fund balance of \$2,414,721.95 (15%) represents a decrease of \$384,838.58 from the end of the 2015-2016 fiscal year. School board policy establishes a fiscal management priority to maintain a general fund balance of 12% or approximately \$2.45 million.

In 2016-2017 local sources of revenue provided 23.90% of total revenue, county sources 4.00%, state sources 64.50%, and federal sources 7.6%. A comparative revenue report is provided in Appendix C.

The state aid formula was revised in 1997. We now receive a preliminary allocation of funds in July, which is subject to change when a final allocation is made in December. As a result, we are approximately six months into the budget year before we have information to accurately determine state aid. Due to this situation, a conservative estimate of state aid revenue is required when making initial projections. The District's initial state aid allocation for 2017-2018 is \$632,341 more than was actually collected in 2016-2017 which is encouraging. However, it is also very likely that another source of state revenue, gross production tax, could decline substantially in 2017-2018. There is also a very real possibility that revenue estimates at the state level, which are the basis for our state aid appropriation, are overstated, and that before the end of the 2017-2018 fiscal year a revenue failure could occur resulting in reduced funding from state sources.

Expenditures

Revenue projections determine the amount of funds available to finance expenditures. In other words, Guthrie Public Schools plan to live within the revenue we will collect. Revenue projections are made in the summer after various allocation notices are received by the district.

Every school site has two budgets; an instructional budget and a library budget. The library budget is normally based upon State Department of Education accreditation requirements which have been waived until the state aid funding factor increases to \$3,291.60 per weighted student. The requirements for each site are: 500 or fewer students, \$9 per pupil; 500-999 students, \$4,500 for first 500 students and \$5 per student above 500; and 1000-1999 students, \$7000 for first 1000 students and \$4 per student above 1000.

The procedure for making expenditures involves the use of the encumbrance system. An encumbrance is an obligation to pay in the form of purchase orders, contracts or salary commitments which are chargeable to an appropriation account, and for which a part of the appropriation is reserved. When an encumbrance is paid, it becomes an expenditure. In this manner, financial officers of the school district are able to distinguish the portion of the budget already expended, the portion encumbered and the portion unencumbered.

Personnel adjustments have been made to reduce expenditures for salaries, benefits and employer payroll costs in the 2017-2018 fiscal year. This has been accomplished largely through attrition. A Fixed Cost Analysis is provided under Appendix C.

Title 70-5-134.1 of Oklahoma Statute, enacted in 1994 and since repealed, required a budget by the function expenditure classification to be approved by the Board of Education. Guthrie Public Schools has chosen to continue this practice for the purposes of public information and transparency. The function dimension describes the purpose of the expenditure. The primary purpose is, of course, instruction. Other functions include library services, counseling services, transportation, building operation and maintenance, and school district administration. A brief definition of the function expenditure classifications can be found in Appendix A.

21 BUILDING FUND

The Building Fund of any school district shall consist of all monies derived from the proceeds of a Building Fund levy not to exceed five (5) mills in any year, unless elimination of personal taxes is voted by the patrons of a school district and by LEA Board Resolution. The Building Fund may be used for erecting, remodeling, or repairing school buildings, for purchasing furniture, equipment and computer software, for repairing and maintaining computer systems and equipment, for paying energy and utility costs, for purchasing telecommunications utilities and services, for paying fire and casualty insurance premiums, for purchasing security systems, for paying salaries of security personnel, or for one or more, or all, of such purposes. Proceeds of such levies shall not be required to be used during the year for which a levy is made but may accumulate from year to year until adequate for purposes intended. The Building Fund is classified as a current expense fund, but shall not be considered a part of the General Fund. Fiscal year 2017-2018 Building Fund revenues are projected to be \$679,551.34.

22 CHILD NUTRITION PROGRAMS FUND

State, federal and local collections of child nutrition monies may be placed in a governmental budget account that will be administered through the school district treasurer and appropriated separately from all other funds. The beginning fund balance each year, combined with all revenues including collected and estimated revenues must be appropriated before being expended.

It is very important that expenditures be limited to the amount of projected revenue available in the Child Nutrition Fund to minimize the need for the General Fund to subsidize child nutrition operations resulting in a reduction in funding available for instructional purposes.

31 BOND FUND

A Bond Fund accounts for proceeds from the sale of bonds, from which all expenditures for bond projects are paid. By law, Guthrie Public Schools shall expend all of the proceeds of such bond issue for the general purposes set out in the proposition voted upon, and shall expend not less than eighty-five percent of the monies allocated to each specific project, unless such project can be completed for a lesser amount of money. Bond Fund titles should include purpose and fiscal year of authorization.

41 SINKING FUND (DEBT SERVICE FUND)

The Sinking Fund of any district shall consist of all money derived from ad valorem taxes or otherwise as provided by law for the payment of bonds and judgments and interest thereon. Since this fund is for the purpose of debt service only, financial reporting as a part of the operating budget will be minimal. A treasurer's check or EFT is issued for Sinking Fund payments according to a legally authorized amortization schedule until all indebtedness, including interest, is paid.

81 GIFTS AND ENDOWMENT FUND

This is a separately appropriated fund established to account for revenue from a philanthropic foundation, private individual, or private organization for which no repayment or special service to the contributor is expected. In many cases endowment funds allow for income derived from such funds to be expended, but the principal must remain intact.

86 CASUALTY/FLOOD INSURANCE RECOVERY FUND

This fund is established to account for receipt of proceeds from the filing of insurance claims and the subsequent expenditure of funds to replace or repair damaged or stolen property.

APPENDIX B

FUNCTION EXPENDITURE CODE DEFINITIONS

1000 INSTRUCTION

Instruction includes the activities dealing directly with interaction between teachers and students. Teaching may be provided for students in a school classroom, in another location such as a home, and in other learning situations such as those involving co-curricular activities. It may also be provided through some other approved medium such as internet, television, radio, telephone, and correspondence. Included here are the activities of teacher assistants of any type that assist in the instructional process. The activities of tutors, translators, and interpreters would be recorded here.

2100 SUPPORT SERVICES - STUDENTS

This involves activities designed to assess and improve the well being of students and to supplement the teaching process. This would include counseling services, health services, psychological services, and speech pathology and audiology services.

2200 SUPPORT SERVICES - INSTRUCTIONAL STAFF

Activities associated with assisting the instructional staff with the content and process of providing learning experiences for students fall into this classification. This would include staff development, and educational media services.

2300 SUPPORT SERVICES - GENERAL ADMINISTRATION

This includes activities involving the establishment and administration of policy in connection with operating the entire school district. This would include Board of Education services, and Office of the Superintendent services.

2400 SUPPORT SERVICES - SCHOOL ADMINISTRATION

Expenditures for overall administrative responsibility of a single school or a group of schools are given this classification. This would include Office of the Principal services.

2500 SUPPORT SERVICES - BUSINESS

Activities concerned with paying, transporting, exchanging and maintaining goods and services for the LEA are coded to this function. Included are the fiscal and internal services necessary for operating the LEA. This would include budgeting, receiving and disbursing, financial accounting, payroll and internal auditing.

2600 OPERATION AND MAINTENANCE OF PLANT SERVICES

This includes activities concerned with keeping the physical plant open, comfortable, and safe for use, and keeping the grounds, buildings, and equipment in an effective working

condition and state of repair. Activities, which maintain safety in buildings, on the grounds, and in the vicinity of schools, are included.

2700 STUDENT TRANSPORTATION SERVICES

This classification provides financial documentation of activities concerned with the conveyance of students to and from school, as provided by state law. Also included is any transportation costs incurred for various school activity trips.

3100 CHILD NUTRITION PROGRAMS OPERATIONS

These are activities concerned with providing food to students and staff in a school or LEA. This service includes the preparation and service of regular and incidental meals -- breakfasts, lunches, or supplements -- in connection with school activities, and the delivery of food.

3200 OTHER ENTERPRISE SERVICES OPERATIONS

Activities that are financed and operated in a manner similar to private business enterprises -- where the stated intent is that the costs are financed or recovered primarily through user charges. One example could be the LEA bookstore, or items purchased through the Activity Fund for resale.

3300 COMMUNITY SERVICE OPERATIONS

This classification accounts for activities that are not directly related to the provision of education to students in the LEA. These include services such as community recreation programs, civic activities, public libraries, programs for custody and care of children, and community welfare activities provided by the LEA for the community as a whole or some segment of the community.

4000 FACILITIES ACQUISITION AND CONSTRUCTION SERVICES

This function classification consists of activities involved with the acquisition of land and buildings; remodeling buildings; the construction of buildings and additions; initial installation or extension of service systems and other built-in equipment; and improvements to sites.

5200 FUND TRANSFER/REIMBURSEMENT (CHILD NUTRITION FUND/ACTIVITY FUND/PETTY CASH/CHANGE)

Transactions that withdraw money from one fund and place it in another without recourse are included in this category.

5300 CLEARING ACCOUNT

This classification is used for recording of expenditures that cannot be charged to a specific function code at the time the expenditure must be made. As an example, this function code would be used for prepayment of workers' compensation premiums.

5500 PRIVATE NONPROFIT SCHOOLS

Expenditure of funds received by the LEA for purchases to benefit students and/or teachers of private nonprofit schools are coded here. It is illegal for these funds to go directly to the private nonprofit schools. The LEA purchases, directly from the provider, supplies or services for the private nonprofit school's use.

7000 OTHER USES

This function classification is used to account for payments made from self-funded workers' compensation, unemployment, medical insurance, and other employee benefit funds.

8000 REPAYMENTS

This would include district payments to outside agencies for refund of restricted revenue previously received for overpayments, nonqualified expenditures, and other refunds to be repaid from district funds.
