

1st Grade
Distance Learning
April 20-24

- Each day you will have 2 short reading passages focusing on 3-4 specific sight words.
 - Follow the simple instructions on each page.
 - Also, challenge your child to reread the passages to build their fluency.
- Each day you will have one page of grammar practice. Students will be required to rewrite the sentences correctly.
- Each day you will have one page of mixed math review.
- In addition to daily practice pages you will find sets of flashcards to practice:
 - Sight words fluency
 - Addition fluency
 - Subtraction fluency

water

I went fishing with my dad. This was the first time for my dad to take me fishing. The first thing we did was put my red fishing rod in the water. My red fishing rod is smaller than my dad's green fishing rod. My red fishing rod is also longer than my dad's green fishing rod. After my fishing rod was in the water, I sat with my dad. Oh my! I see a fish in the water. I yank my fishing rod out of the water faster than my dad. I was the first to get a fish!

Fred the Frog will find a brown, long log to sit on every now and then. It took him a long time to find his long log to sit on. Now that he can sit on the long log, he will find a fly to munch. He will sit very still for a long time until he can find a fly to munch on. After a long time, he sees a fly. One...two...three...now! He eats the fly! Now, Fred the Frog is happy. He will hop home now and find a long log to sit on another day.

Ann and Bill have a part in the school play. Ann made a hat for the play. “May I come over to make a hat for my part in the play?” Bill asked. “Yes, you may come over to make a hat for your part in the play,” Ann said. All day long, Ann and Bill made their hats. Soon, other people who had a part in the play wanted to make hats. “May we come over to make a hat?” they asked. “You may come over!” All day, they made hats for their parts in the play.

One day Glen heard a loud sound. It was his friend Bill's new dog.

The dog was making a loud, barking sound over at Bill's house. Glen would go over and take the new dog a bone. If the new dog will take the bone, he will stop making that loud sound over at Bill's house. When Glen went over to Bill's house to take the new dog a bone, the new dog was very happy.

Glen could not hear the loud sound coming from the new dog over at Bill's house anymore. Glen will take a new bone over to Bill's house the next day,

I only like to work on my spelling words for a little bit of time. I

know it is good to work on my spelling words. It will help me get a good grade. First, I work on the words I know how to spell. I only work on those words for a little while because I already know how to spell them.

I know how to spell little words like “the” and “can.” Then, I work on the words I do not know how to spell. The words I do not know how to spell are not little words. They are big words. I know if I work hard, I will

know how to spell the big words, too!

I am six years old. I live in a place by a lake. This place has been my home for many years. It is a good place for me to live. My mom, dad, and little sister live with me. My little sister is three years old. She likes to live in this place, too. We also live with our cat, Gus. Gus is two years old. He likes to sleep with me. Gus likes to live in this place. It has a big place in the back for him to run. I like when my little sister and our cat, Gus play with me. I'm glad we live in this place!

Addition Top-It

Players 2

Materials: Deck of cards, face cards worth ten, Ace worth 1 or 11.

How to Play: Each player turns over two cards and adds them together. The player with the greatest sum wins all the cards. Continue until all the cards are gone.

$$2 + 10 = 12$$

$$5 + 5 = 10$$

Player 1 wins all four cards.

Make the game easier by taking higher digit cards out of the deck. Make the game harder by add 3 cards.

Subtraction Top-It

Players 2

Materials: Deck of cards, face cards worth ten, Ace worth 1 or 11.

How to Play: Each player turns over two cards and subtracts the smaller digit from the larger digit. The player with the smallest difference wins all the cards. Continue until all the cards are gone.

$$7 - 2 = 5$$

$$9 - 5 = 4$$

Player 2 wins all four cards.

Make the game easier by taking higher digit cards out of the deck. Make the game harder by playing with 2-digit - 1-digit subtraction.
