NAME \_\_\_\_\_

# PA.A.1.1

For each of the following relations tell whether the set is a function.

①

Input Output

A → 75  
B → 73  
C → 68  
D → 65

②

Input Output

1 → 5  
2 → 6  
3 → 7  
4 → 8

Determine whether or not each graph represents a function.

③

④

Determine whether the ordered pairs represent a function.

⑤

$\{(0,3), (1,5), (2,3), (3,1), (4,0)\}$

⑥

$\{(3,-1), (2,-5), (5,5), (3,-5), (4,6)\}$

Determine whether or not each data set represents a function.

⑦

x	y
0	2
1	3
3	5
5	7

⑧

x	y
-3	4
2	7
2	6
4	9

9

Arial is a beautician. She charges different rates for different lengths of hair. What are the dependent and independent variables?

10

Chase needs to get a good grade on his next Algebra test. He must study a lot in order to get a good grade? What are the dependent and independent variables?

A function pairs an input value with exactly one output value.

NAME Key  
PA.A.1.1

For each of the following relations tell whether the set is a function.

① Input Output

A → 75  
B → 73  
C → 68  
D → 65

yes  
function

② Input Output

1 → 5  
2 → 6  
3 → 7  
4 → 8

yes  
function

Determine whether or not each graph represents a function.

③

NOT  
a function

④

yes - function

Determine whether the ordered pairs represent a function.

⑤

{(0,3), (1,5), (2,3), (3,1), (4,0)} yes

⑥

{(3,-1), (2,-5), (5,5), (3,-5), (4,6)} no

Determine whether or not each data set represents a function.

⑦

x	y
0	2
1	3
3	5
5	7

yes

⑧

x	y
-3	4
2	7
2	6
4	9

no

“Who is misbehaving?”

Mathantics has a good video  
Algebra Basics: What are functions?

9

Arial is a beautician. She charges different rates for different lengths of hair. What are the dependent and independent variables?

Length of hair represents the Independent  
Rate (charge) represents the Dependent

10

Chase needs to get a good grade on his next Algebra test. He must study a lot in order to get a good grade? What are the dependent and independent variables?

Studying represents the Independent  
the grade represents the Dependent

Learn Zillion has a great video on this -  
"Identify independent and dependent variables"

NAME \_\_\_\_\_

## PA.A.1.2

Kendall weighs 130 pounds. She goes to ABC Gym and starts exercising. The graph below shows the number of hours she exercised and the pounds she lost.

### Kendall's Weight

1. What does the y-intercept represent?
2. What is the ratio of the slope of the line?
3. How many pounds had Kendall lost after 2 hours of exercise?
4. Is the slope negative or positive?

5

A furnace technician charges \$20 per hour and a one-time service charge of \$30. Which equation represents the total charge ( $y$ ) for working  $x$  hours?

A  $y = 20x + 30$

B  $y = 30x + 20$

C  $y = 20(x - 30)$

D  $y = 20(x + 30)$

NAME Kay

**PA.A.1.2**

Kendall weighs 130 pounds. She goes to ABC Gym and starts exercising. The graph below shows the number of hours she exercised and the pounds she lost.

**Kendall's Weight**

1. What does the y-intercept represent? *The beginning weight or the weight with no exercise (130 lbs)*
- change in y-values*  
*change in x-values* 2. What is the ratio of the slope of the line?  *$\frac{\text{weight}}{\text{hours exercised}}$*
3. How many pounds had Kendall lost after 2 hours of exercise?  
*10 lbs*
4. Is the slope negative or positive?  
*negative*

5

A furnace technician charges \$20 per hour and a one-time service charge of \$30. Which equation represents the total charge ( $y$ ) for working  $x$  hours?

A  $y = 20x + 30$

B  $y = 30x + 20$

C  $y = 20(x - 30)$

D  $y = 20(x + 30)$

*ask yourself - what varies?  
what is constant?*
