The Big 9

Approximately 90% of food allergy reactions occur from one of nine common foods in the U.S. known as "The Big 9." These foods include: milk, eggs, peanuts, sesame, tree nuts, fish, crustacean shellfish, wheat and soy. More than 160 foods have been identified to cause food allergies in sensitive individuals. There are also several food ingredients that cause nonallergic hypersensitivity reactions in sensitive individuals.¹ Any food can cause anaphylaxis, a potentially life-threatening reaction to food allergens. Avoidance of the offending food is recommended to prevent potentially life-threatening reactions by those with food allergies. For this reason, it is important to communicate food allergy concerns with your school team. Please reach out to

both your school nurse and school foodservice director to coordinate a meeting to discuss any special dietary needs required for school meals. For more information on food allergies, consider reviewing the resources below:
