

Use camera features on your Chromebook

You can use the camera on your Chromebook to take photos or videos, or edit and print photos.

Take a photo or video with your Chromebook

1. In the corner of your screen, select the Launcher .
2. Open Camera . Then, on the right side, choose an option:
 - Select **Photo** > Take photo .
 - Select **Video** > Start recording .
 - Select **Square** > Take photo .

Change how photos or videos are captured

- **Change your settings:** Select Settings . Change the size of the grid, the length of the timer, or the camera resolution.
- **Flip your photo from left to right:** Select Mirroring .
- **Use gridlines to straighten photos:** Select Grid .
- **Switch between cameras:** At the left, select Switch camera 
 - **Tip:** You can only switch cameras if you plug in an external camera or your Chromebook has 2 built-in cameras.
- **Take photos with a timer:** Select Timer .
- **Take photos with the volume buttons:** When your Chromebook is in tablet mode, you can press the up or down volume button to take a photo. [Learn more about tablet mode.](#)
- **Take a photo while you record a video:** While you record a video, select Take video snapshot .
- **Pause a recording:** You can pause a recording, and continue recording on the same video later.
 - **Important:** When you pause a video recording, your Chromebook will save the video unless you delete it.
- **Pan, tilt, and zoom your camera:** Select Pan, tilt, and zoom 
 - **Tip:** If you don't have this option, your camera doesn't support pan, tilt, and zoom.

Find or save your photos or videos

- **Find your photos and videos:** In the Camera app , on the bottom right, select your most recent photo or video.
- **Find new photos and videos:** In Files , select **My files** > **Camera**. Older photos and videos may be found in the "Downloads" folder. [Learn how to store your downloaded files.](#)

Edit, delete, or print your photos

1. Select the photo you want to edit.
 - **Tip:** In the Camera app , on the bottom right, you can select your most recent photo or video.
2. Choose an option:
 - **Rename a photo:** At the top left, select the filename. To save the new name, press **Enter**.
 - **Crop or rotate your photo:** At the top, select **Crop & rotate** .
 - **Change your photo's width and height:** At the top, select **Rescale** .
 - **Adjust contrast or brightness:** At the top, select **Lighting filters** .
 - **Undo or redo changes:** Select **Undo**  or **Redo** .
 - **Delete a photo:** At the top, select **Delete** .
 - **Print a photo:** At the top right, select **More** : **Print**.

Tip: To do more advanced photo editing, you can use an app like [Google Photos](#) , [Pixlr Editor](#) , or [Sumo Paint](#) .

QR Code scanning

1. Open Camera .
2. On the right, select the QR .
3. Center your on-screen QR Code in the QR Code finder window.
4. Once a QR Code is detected, a link and a copy button appears.
5. At the top of the QR Code finder, select the link to open a new Chrome tab.
 - **To copy the link to the clipboard:** Select the copy button.
